What's New?

*Download your FREE copy of the
NECA/FOA-301 Fiber Optic
Installation Standard. Go to
<http://www.thefoa.org/NECA301-MO.html>
for instructions.*

Welcome to the FOA!

You are now certified by the FOA, the professional society of fiber optics. Your certification indicates professional achievement in the premier field of communications.

Keep your identification card with you. It indicates your certifications, your certification number and when your certification active listing expires.

Your certification itself never expires, but you must renew your membership and certification listing with the FOA annually so we know you are still active in the field and can confirm your status with anyone who inquires. Your renewal will help fund FOA activities in important areas like education, standards and promotion of fiber optics. It also allows us to continually update our website and publish our monthly online newsletter. If your certification lapses for a period of more than three years, you will be required to retest to return to active status.

Add your name to the FOA email newsletter list. Also, keep up with the FOA activities and new developments in fiber optic technology on the FOA website, www.thefoa.org. The website also includes many technical reference materials on basic fiber optics and new technologies including an extensive reference library on fiber optics.

Having completed your CFOT, we suggest you look now at the requirements for the FOA advanced and specialist certifications. These certifications are the pinnacle of achievement in fiber optics. If you are interested in advanced certifications, go to the FOA website and download a FOA logbook to keep track of your experience and use the FOA Online Reference Guide to expand your knowledge.

Regards,

Jim Hayes
President

*Here's your identification card. It shows
your number, certification levels and
expiration date.*

Cut out the card and keep it with you!
